

StringFormatter::printEscape

StringFormatter::printEscapes

StringFormatter::printEscape

```
graph LR; A[StringFormatter::printEscape] --> C[StringFormatter::printEscape]; B[StringFormatter::printEscapes] --> C;
```

The diagram illustrates a mapping or transformation. On the left, there are two separate boxes: the top one contains the text 'StringFormatter::printEscape' and the bottom one contains 'StringFormatter::printEscapes'. On the right, there is a single box containing 'StringFormatter::printEscape'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the right box, indicating that both 'StringFormatter::printEscape' and 'StringFormatter::printEscapes' are mapped to the single 'StringFormatter::printEscape' entity on the right.
